

June 5, 1952

Dear Francis:

We're glad you and Betty have decided to come here. Whatever arrangements you make will be OK; we can perfect them, if necessary, after you get here.

Aren't you going to talk about Periodic Selection (=? periodic sampling?) It seems a very timely and pertinent topic.

Have you ever taken the Western Ontario route? (Niagara Falls - Port Huron). We drove this way last summer, visited Robinow en route, at London, and rather enjoyed it. There's a ferry from Muskegon, Mich. - Milwaukee that I hear well of. At least it saves a good deal of driving if not total elapsed time.

Our lab phone is 5-3311, Ext. 4218; Hans' is 4523. The home numbers are 5-5289 and 3-6937 resp.

Sincerely,
